

Advantages of our STEM kit Gravity Racer project

- **Amazing design** This is F1 without the engine. The running gear is fully adjustable. We conform to the UK and international Tech. Spec for entry into events.
- **Health and Safety** This is integral to all aspects of the project. We can advise on any queries.
- **Reusable** Our green friendly kits are designed to be stripped and rebuilt year on year. Including the advantage of 'One payment for Ever'.
- **Proven track record.** Producing racers since 2002. Raced at the Goodwood Festival of Speed as VXR. First World Land Speed 2008. Running gear and consultant engineers for 2016 World Land Speed. Fastest ever run at Mumbai Red Bull.
- **Over 200 kits produced** and distributed Worldwide to schools, colleges and privateers.
- **Help** We work with each build to help and support.
- **Our racer kits** Supplied with all the hard stuff done. You need normal tool box to assemble. We can supply specialised kits with partially or fully built kits. (bodywork not supplied)
- **The project creates** local and national Community and parent links to funding, school college work experience, local jobs, STEM links, Engineering Ambassadors, Local gravity events.
- **Also creates** increased aspirations levels, school attendance, curriculum links, pride in attainment, inventiveness and builds confidence, team building, engineering techniques, and that education can be fun.
- **Cross Curricular links** the skills needed are about obtaining sponsors, designing bodywork materials, aerodynamics, logos and art work to the engineering of constructing the kit. We also encourage a photographic record of the project and build together with an engineering log. Science, English, Maths and Engineering at the forefront. Also, road and driver safety.
- **Events** Many events across the UK. The organisers are usually extremely helpful to entrants
- **Our project ticks so many of the skills and knowledge needed for qualifications.**
- **The record also gives a very impressive CV**
- **This project ticks all the green environmentally friendly boxes.**
